

AuthenticWeb™ for State Filing

Helping you ensure speedier approvals with resources to monitor compliance, maintain internal tools, and accurately prepare filing submissions

AuthenticWeb Benefits:

- AuthenticWeb operational compliance tools provide work flow specific regulatory content, analysis, and forms in an easy-to-use web-based tool.
- Intuitive interface makes AuthenticWeb easy to use and quick to learn.
- Expert Summaries—Obtain answers to key regulatory questions impacting product filing processes.
- Compliant State Transmittal Forms—Complete filing transmittal forms with confidence that the correct and most up-to-date documents will be included in the filing.
- E-Mail Alerts—Stay abreast of regulatory changes by subject matter, jurisdiction, and line of business.
- Industry Experts—Support you can rely on from compliance professionals, insurance attorneys, and former insurance regulators.

Overview

State Filing Managers face ever-increasing demands to achieve improved speed-to-market objectives that drive attainment of corporate revenue goals. A delay in the introduction of a new or revised program carries with it millions of dollars in lost revenue opportunities. In an environment of complex and frequently-changing regulatory requirements, and often-reduced resources, overcoming state filing-related challenges can be overwhelming. AuthenticWeb can help.

AuthenticWeb for State Filing is a web-based tool combining key regulatory details and transmittal forms in an easy-to-use, quickly deployable resource. Updated as requirements change, AuthenticWeb delivers current and accurate information directly to the user's desktop.

Created and maintained by our staff of regulatory compliance professionals, AuthenticWeb for State Filing is the perfect complement to SERFF and other filing services.

AuthenticWeb for State Filing includes:

- More than 100 different compliance topics related to rate, form, and rule filings
- Easy and convenient access to all transmittal forms and related instructions
- Timesaving features to help you prepare multiple and complex filings
- Transmittal forms tool automates redundant data entry for multistate or multicarrier filings
- Forms in both Word and Excel® formats—you pick the format best for you
- Updates as requirements change
- E-mail alerts help to make sure you do not miss a thing

Helping you ensure speedier approvals with resources to monitor compliance, maintain internal tools, and accurately prepare filing submissions

Value

AuthenticWeb for State Filing allows users and managers to focus on achieving business objectives, rather than the time-consuming research and maintenance of monitoring regulatory requirements. AuthenticWeb contains complete research for all laws and regulations related to state filing in one easy-to-use resource. Filers intuitively access easy-to-read summaries of rate, rule, and form filing requirements covering all major product lines in all jurisdictions. Transmittal forms tool automates redundant data entry for multistate or multicarrier filings.

AuthenticWeb organizes content relevant to the state filing process using a meaningful index of topics and subtopics. Intuitive search tools and informative analysis means users will know what is required even if they do not have a law degree.

Our experts read and analyze requirements so you can quickly and easily determine the impact on operations. Our expert summaries provide the insight functional staff need in plain language. In fact, AuthenticWeb tools can make the work for your staff easier and more efficient—freeing up valuable resources to focus on achieving business objectives.

Complete state filing forms with confidence using AuthenticWeb's forms and regulatory help files. AuthenticWeb forms are flexible and user friendly. Users may complete on-line, download to their desktop, or use to maintain system forms. Regulatory help files for each form help to reduce guesswork, improve compliance levels, and ensure speedier approvals.

AuthenticWeb for State Filing is available in a variety of subscription options for Property & Casualty and Life & Health lines of business.
